ABS Delivers PIDX Compliant Solutions
For Oil Industry Suppliers

- Act Business Solutions was founded as a cloud organization to directly serve the Petroleum industry B2B needs. The key Company Directors brings together over 90 years joint business. Through our sister company ACT Global consulting we bring consulting and technical experience gained in some of the largest companies involved in the Oil & Gas sector including BP, Shell, Conoco, Baker Hughes. We also have skills within the EAI B2B vendors. These include GXS, Sterling Commerce, IBM ,Elemica, Savi and Oracle.
- The core roadmap is a cloud service enterprise that is unparalleled in terms of cost, functionality and flexibility. Our mission is 100% Supply Chain connectivity for our customers with their trading community using our solution EDX. We provide a complete data translation and communications service that takes care of your ebusiness remotely and expertly.
- Our any to any service means that we are completely independent in terms of both standards and protocols. Marketplace and technological developments are a natural feature of today's business world so it is important to know that your strategic ebusiness partner provides you with advice and a fully considered, future-proof solution.
- We have taken our industry knowledge and built our solution using proven process and a robust infrastructure. Our cloud model saves our customers money whilst keeping them in full control of their data.

- Can run completely automated, contains built-in scheduler

3

- Any data exchange mix of Person to Person, Application to Application or Device to Device
- Simple Deployment
- All you need is an IP connection
- Broadband, Leased Line, Satellite or even a Dialup Modem

Ease of Use

- Technicians require secure systems
- Users require simplicity
- Traditionally these do not come together
- ABS gives all the security technicians require with ease of use that users want

Invoice Processing In PIDX Format at 5% of the alternate cost

“A large Arkoma area client recently required all high volume service providers to integrate with their new electronic invoicing system. Our legacy accounting system could not directly integrate and there was no time to select, implement, and train staff on an entirely new system. With ABS as our integration partner we were able to utilize our existing system and implement just a few minor procedural changes in order to comply with the client’s requirements. We are very pleased because we avoided unnecessary impacts on staff productivity in addition to significant costs that would have had zero guarantee of success.”
